## CONTACT

9071812823

amulyamallur0202@gmail.com

Mallur, Shidlaghatta  
Chikkaballapura 562102

www.linkedin.com/in/amulya-m-905b691aa  
amulya0299.github.io/

## SKILLS

- Plant Physiological phenotyping
- Metabolomics (LC-MS-based metabolite profiling)
- Proteomics (Shotgun proteomics)
- Molecular Biology (DNA/RNA extraction, gene expression studies, SDS-PAGE)
- Data Analysis and Bioinformatics (R, Metaboanalyst, KEGG, UniProt)

## LANGUAGES

- Kannada
- English
- Hindi

## PROFILE

Ph.D. Scholar in Crop Physiology with research expertise in salinity stress tolerance of Pearl Millet-Napier hybrids, integrating plant physiology, metabolomics, proteomics, and molecular approaches to elucidate stress adaptation mechanisms.

## WORK EXPERIENCE

**ICAR-SRRS-IGFRI Dharwad**  
Honorary Research Assistant

Worked as an Honorary Research Assistant in the project "Combined stress tolerance of Waterlogging and Salinity in fodder grasses" (CRSC IGFRI SIL 20180901) at IGFRI-SRRS, Dharwad from January 01, 2023 to December, 31, 2023.

## EDUCATION

| Degree                  | Year      | Institution                                                       | OGPA /% |
|-------------------------|-----------|-------------------------------------------------------------------|---------|
| M.Sc. (Crop Physiology) | 2021-2023 | University of Agricultural Sciences, Dharwad                      | 8.81    |
| PG-DIPLOMA (PGDAWM)     | 2024-2025 | MANAGE, Hyderabad, Telangana-500030                               | 81.00   |
| B.Sc. (Agriculture)     | 2016-2020 | University of Agricultural and Horticultural Sciences, Shivamogga | 8.70    |
| PUC                     | 2016      | Vidhyadri Pre-University College, Chikkaballapura                 | 95.67   |
| SSLC                    | 2014      | Sri Morarji Desai Residential School, Bangalore Rural District    | 89.60   |

## NATIONAL ELIGIBILITY TEST

Qualified UGC-NET in Environmental Sciences, 2025.

## AWARDS

- Best Oral Presentation Award – Presented at the Post-Graduate Research Conference, University of Agricultural Sciences (UAS), Dharwad, 2026.
- Best Poster Presentation Award – Awarded at the International Conference on “Feeding the Future through Sustainable Eco-friendly Innovations in Rangelands, Forages and Animal Sciences”, University of Agricultural Sciences (UAS), Bangalore, 2–4 December 2023.

## TRAINING PROGRAMMES:

- Krishi Manthan: 30 days Summer school International Training programme organized by SKLTSHU, Telangana, from July 15 to August 15, 2024.
- ANRF-SERB funded Karyashala on "Phenotyping for nitrogen use efficiency and stress tolerance: Dissection of component traits using physiological and phenomic approaches" at Division of Plant Physiology, ICAR-IARI, New Delhi during August, 5 to August 14, 2024.

## CONFERENCES

- 1.Changes in Membrane stability and Tissue tolerance mechanisms in PMN hybrids under salinity stress. **Amulya M**, Doddamani, M. B, Edna Antony, Kuligod V B in 5<sup>th</sup> Post Graduate Research Conference-2022 at University of Agricultural Sciences, Dharwad.
- 2.Changes in Physiological traits in response to salinity stress in Pearl Millet Napier (PMN) hybrid genotypes [*Pennisetum glaucum* (L.) R. Br.] x [*Pennisetum purpureum* (K.) Schum]. **Amulya M**, Anusree K, Aravind B, Doddamani M, B, Kuligod V, B, Sridhar K, Edna Antony, Published in the proceedings of the National Conference of Plant Physiology "Physiological and Molecular Approaches for Climate Smart Agriculture" during 09-11 December 2023, ICAR-IARI, New Delhi. Session F: Millets for Climate Resilience and Nutrition. Page No- 140 (PF-94)
- 3.Tissue Tolerance, Fatty Acid Profiling and Sodium Partitioning for Salinity Tolerance in Pearl Millet Napier (PMN) Hybrid Genotypes [*Pennisetum glaucum* (L.) R. Br.] x [*Pennisetum purpureum* (K.) Schum] **M. Amulya**, K. Anusree, P.V. Rakshata, B. Aravind, M.B. Doddamani, Edna Antony, V.B. Kuligod and K. Sridhar International Conference on "Feeding the Future through Sustainable Eco-friendly Innovations in Rangeland, Forages and Animal Sciences" during 2-4 December 2023, UAS Bangalore.
- 4.Metabolomic perspectives of salinity tolerance in Pearl millet Napier (PMN) hybrids, **Amulya M**, Edna Antony, Yogendra Kalenahalli, Doddamani MB, Sridhar K, P-237 (ICPP2025-241) in the proceedings of 6<sup>th</sup> International Conference on Plant Physiology "Translational Genomics and Physiology for Sustainable Agriculture" during 15-18 December 2025, at TNAU, Coimbatore.
- 5.Deciphering salinity tolerance mechanism in pearl-millet Napier hybrids through metabolite profiling, **Amulya M** and Edna Antony, in 9<sup>th</sup> Post Graduate Research Conference-2026 at University of Agricultural Sciences, Dharwad.
